What is Tramadol?

Tramadol is a prescription pain medication widely used in the U.S. to manage moderate to moderately severe pain. It works by affecting the brain's pain receptors to reduce discomfort safely when used as directed.

For trusted U.S. medical guidance:

Tramadol Usage / Dosage Table (USA Standards)

Condition	Typical Adult Dose	Frequency	Notes
Moderate Pain	50–100 mg	Every 4–6 hours as needed	Do not exceed 400 mg/day
Chronic Pain (Extended-Release)	100 mg	Every 12 hours	Use only under medical supervision
Elderly / Sensitive Patients	25–50 mg	Every 6–8 hours	Start with lower dose, adjust as tolerated

⚠ Always follow your U.S. healthcare provider's instructions. Dosage may vary depending on your medical condition, age, and other medications.
